

Filtering Calls/Units in mobile:

Filtering works the same for every column you can see. Please be aware that filtering can eliminate your ability to see calls/units depending on the parameters you have set.

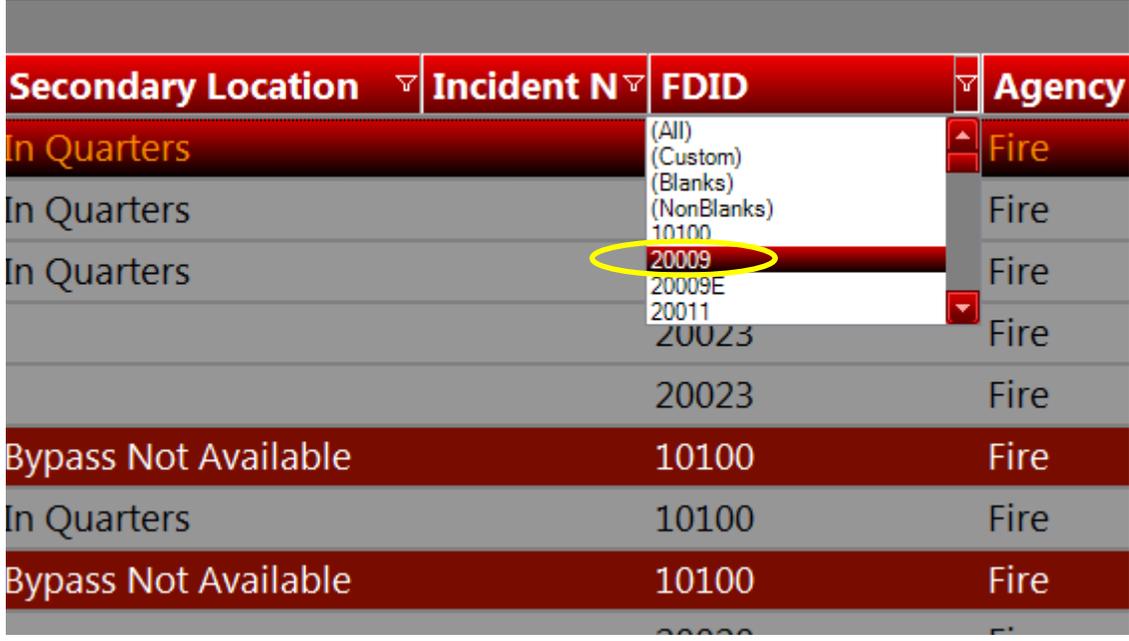

To begin changing a filter and limit what you're currently looking at follow these instructions.

Click on the funnel at the top of the column you want to filter:

at	Secondary Location	Incident Number	FDID	Agency Type	At P
	In Quarters		20023	Fire	
	In Quarters		20023	Fire	
	In Quarters		20027	Fire	
			20023	Fire	
			20023	Fire	
	Bypass Not Available		10100	Fire	
	In Quarters		10100	Fire	
	Bypass Not Available		10100	Fire	
			20020	Fire	
	In Quarters		20028	Fire	
			20020	Fire	
			20009	Fire	
			20009	Fire	

If you only want to view one specific entry, you can simply click on the entry in the list that displays & it will filter based on that entry:

Secondary Location	Incident N	FDID	Agency
In Quarters		(All)	Fire
		(Custom)	
		(Blanks)	
		(NonBlanks)	
		10100	Fire
		20009	Fire
		20009E	Fire
		20011	Fire
		20023	Fire
		20023	Fire
		20023	Fire
		10100	Fire
		10100	Fire
		10100	Fire
		20009	Fire

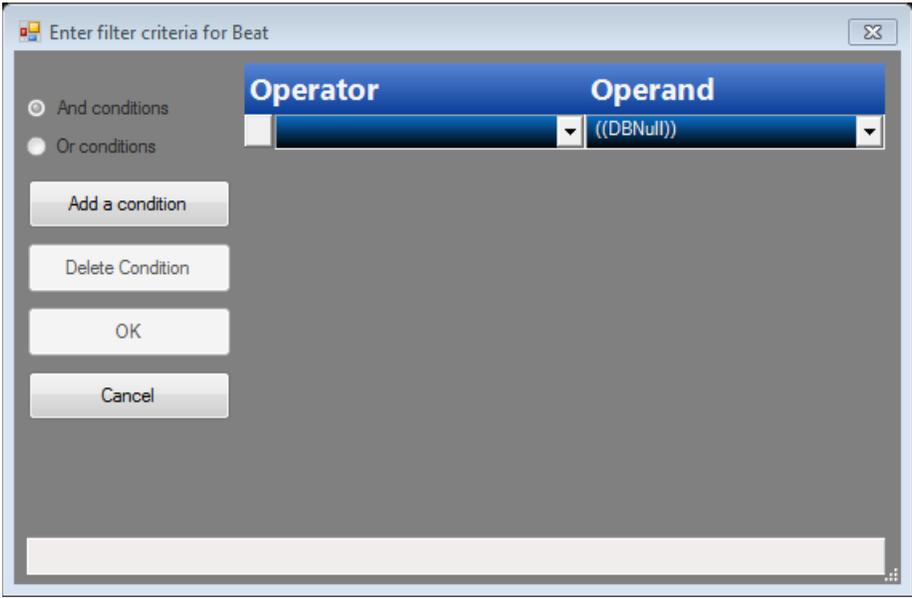

Your screen would then look like similar to this:

Date/Time	Apparatus	Primary Officer	Status	Call Type	Call Location	Beat	Secondary Location	Incident N	FDID	Agency Type	At Patient Date/Time
10/20/2015 08:53:05	ND9		In Quart...						20009	Fire	
10/17/2015 23:40:38	ND8		Available...						20009	Fire	
10/19/2015 15:00:30	ND7		Available...						20009	Fire	
10/19/2015 21:40:05	NRR		In Quart...				In Quarters		20009	Fire	
10/19/2015 15:16:03	N57		In Quart...				In Quarters		20009	Fire	
10/17/2015 15:32:48	N108B		Available...						20009	Fire	
09/25/2015 08:01:30	NU9		In Quart...				In Quarters		20009	Fire	
10/18/2015 00:05:28	N78B		In Quart...						20009	Fire	
10/19/2015 20:49:48	RES08		In Quart...						20009	Fire	
06/25/2015 10:14:49	NEMSD9		In Quart...						20009	Fire	
03/02/2015 07:31:17	STA10		In Quart...						20009	Fire	
03/02/2015 07:31:17	STA07		In Quart...						20009	Fire	
03/02/2015 07:31:17	STA09		In Quart...						20009	Fire	
03/02/2015 07:31:17	STA08		In Quart...						20009	Fire	
03/02/2015 07:24:37	N9MD1		In Quart...						20009	Fire	
10/19/2015 21:07:57	LAD9		In Quart...						20009	Fire	
10/12/2015 10:00:28	N88B		In Quart...						20009	Fire	
10/19/2015 20:49:47	ENG10		In Quart...						20009	Fire	
10/19/2015 15:25:05	NTRFC9		In Quart...				In Quarters		20009	Fire	
10/19/2015 20:49:47	ENG9		In Quart...						20009	Fire	
10/19/2015 21:40:34	ENG8		In Quart...						20009	Fire	
10/19/2015 20:49:47	ENG7		In Quart...				In Quarters		20009	Fire	
10/17/2015 08:13:52	N93		In Quart...				In Quarters		20009	Fire	
10/20/2015 10:08:10	N95		Available...				In Quarters		20009	Fire	

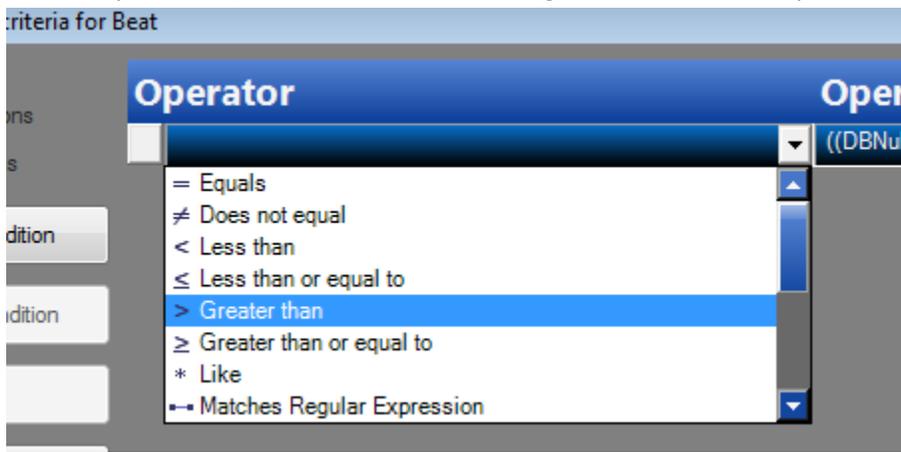

To filter more than one value, click (Custom) from the drop down list after clicking the initial filter button:

Secondary Location	Incident N	FDID	Agency Typ
		(All)	Fire
		(Custom)	Fire
		(Blanks)	Fire
		(NonBlanks)	Fire
		10100	Fire
		20009	Fire
		20009E	Fire
		20011	Fire
In Quarters		20009	Fire
In Quarters		20009	Fire
		20009	Fire
In Quarters		20009	Fire
		20009	Fire

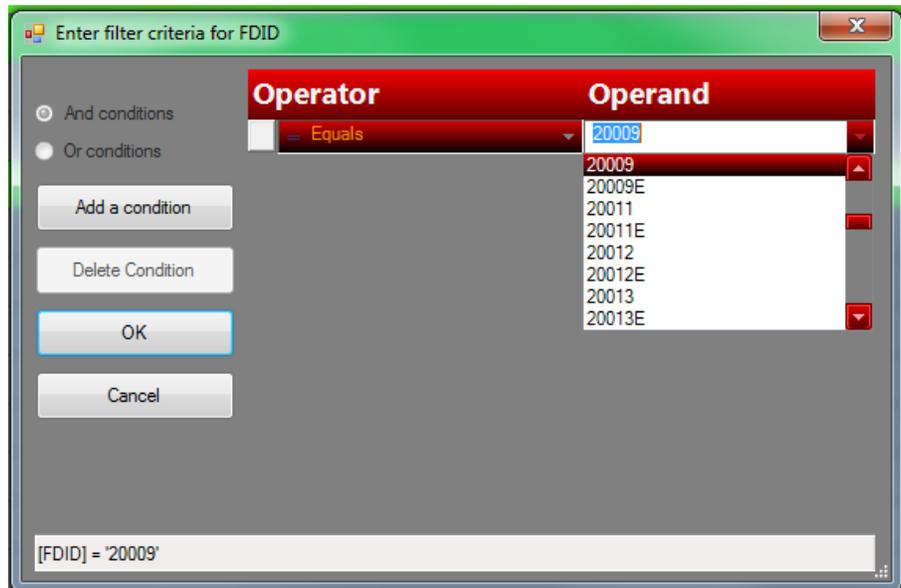

A Custom filter window will appear:

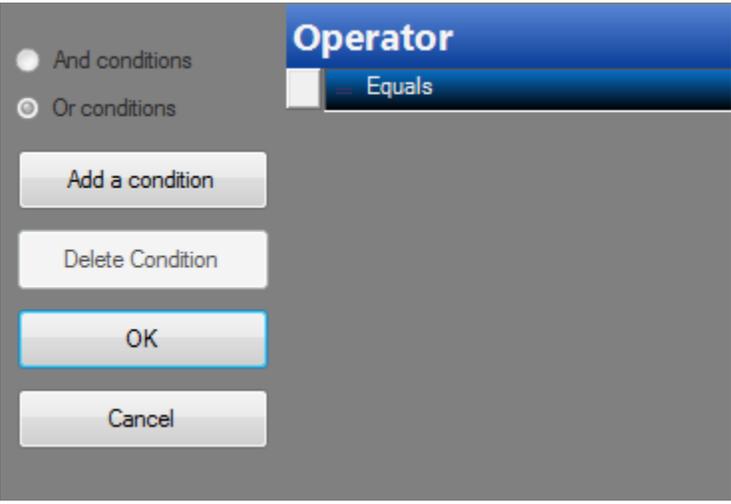

To enter multiple values, click the downward facing arrow under the "Operator" field:

The operator options specify how you're going to match the operand. So if you select Equals, then the filter will be set to only those values that equal exactly what's in the Operand field. The operand field gives you a list of all the available values that are currently in the list you're filtering. So if you're filtering FDID, you should expect to see options like "20009", "20009E", "20012" etc..

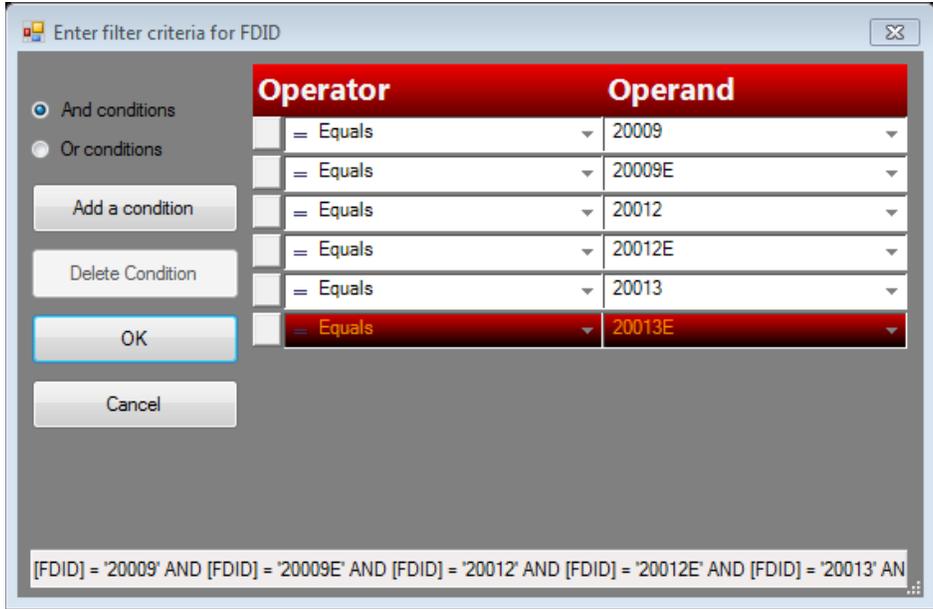

You can enter multiple values by clicking on "Add a condition" on the left side of the filter screen:

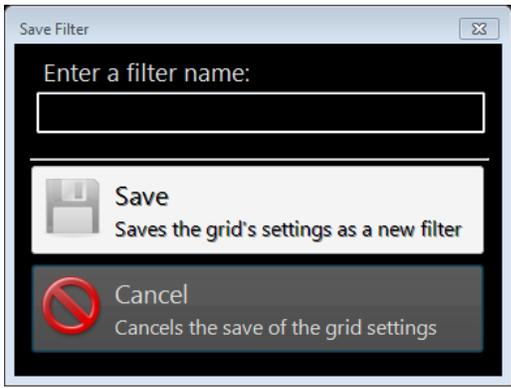

This will add additional lines to establish filters with. Once you've added a second filter, the radio buttons "And conditions" and "Or conditions" will become active. Generally you want to select "OR" as "AND" will require all conditions to be met in order to be displayed.

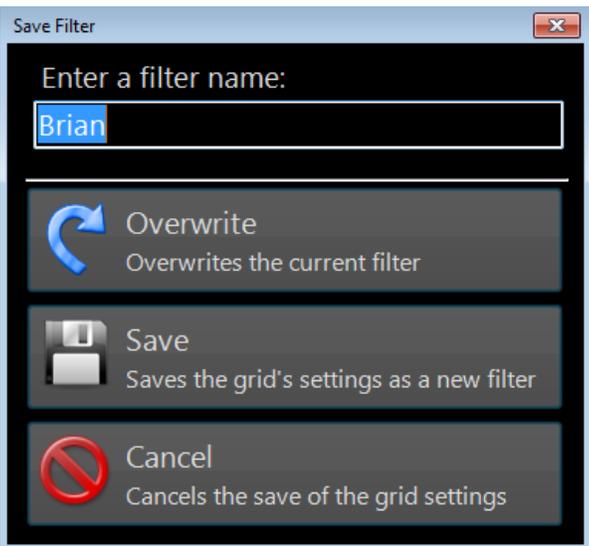

Using advanced filters, you can select as many operator/operand combinations as you like. Your screen will be filtered based on whatever criteria you enter:

Once you have your screen filtered how you want it, save the filter by clicking on the filter button, on the left side of the screen, then click Save Filter. You will be asked to name the filter, type any name, then click Save:

You can overwrite an existing filter once you've created it. The Save filter display box will change after you've saved your first filter to this:

To return to seeing all values that you're permitted to see, simply click the "Filter None" button. If you're not sure whether your screen is filtered or not, there is an indicator icon on the very right side of the status bar, directly below the main ribbon:

Call Type	Call Location	Beat	Secondary Location	Incident N	FDID	Agency Type	At Patient Date/Time
					20009	Fire	
					20009	Fire	
					20009	Fire	
			In Quarters		20009	Fire	
			In Quarters		20009	Fire	
					20009	Fire	
			In Quarters		20009	Fire	
					20009	Fire	
					20009	Fire
